

## Liberty KU band Flyaway

**Liberty Uplink**  
**FIELD OPERATIONS**

**+1.917.254.0155**

Utilizing the same transmission equipment as an SNG vehicle – Deployable with our customized Sprinter or self-contained, Liberty Uplink's KU flyaway is the transmission solution for hard to reach coverage locations anywhere. Fully redundant transmission electronics and the technical expertise required to insure successful transmissions – from the most challenging of locations from rooftop to mountaintop.

- Cost effective transmissions over lengthy deployments
- Deployable with our customized Sprinter van or stand-alone
- Industry standard, field tested equipment with Tandberg Encoding
- Scalable from single camera to multi camera with satellite returns
- IFB and PL equipment for communications – GSM & Satellite Telephony
- Camera crewing available
- Supports DVB-S and DVB-S2 Encoding – QPSK & 8PSK Modulation
- Intelsat registered
- Air shippable worldwide – ATA rated watertight flight cases
- Available 24/7/365 with engineer
- Dual or Triple Path SD Digital / Dual Path HD
- NTSC / PAL – 120V or 220V operation
- Ships from Providence, RI
